

# COCO DOTS™

## COIR PLUG PELLETS FOR SEED SOWING

*Coco Dots netted coir pellets are perfect for starting off seeds. Each pellet is wrapped in a protective net that holds the compost in place during and after expansion. Simply place in pot or tray with water and watch the Dots expand!*

### FEATURES

- ✦ Easy to use and carry
- ✦ Makes a 30mm diameter plug of compost
- ✦ Perfect for seed sowing and growing on young seedlings
- ✦ Rooting plant cuttings and growing them on
- ✦ Promotes fast seed germination
- ✦ Excellent aeration, drainage and moisture retention for promoting strong root growth
- ✦ Encourages beneficial plant microbes, and is pH and nutrient balanced

### BENEFITS

- ✦ 100% natural
- ✦ Sustainable and environmentally friendly
- ✦ Reliable fast germination
- ✦ Improved root growth
- ✦ Easy and convenient to use and handle
- ✦ Enhanced water retention, long lasting

### USES

- ✦ Great for sowing seeds and potting on
- ✦ Use in sowing trays and pots
- ✦ Easy handling and transplanting

### TECHNICAL SPECIFICATIONS

|                                    |           |
|------------------------------------|-----------|
| pH Value                           | 5.5 - 6.8 |
| Electrical Conductivity (EC Value) | <0.5ms/cm |
| Coir Ageing                        | 6+ months |
| Sand                               | <3%       |
| Sieve                              | <6mm      |
| Moisture                           | 13-20%    |

### HOW TO USE:

Add water.

Place the seed in the centre of the expanded pellet and cover lightly.

Keep damp until seed germinates.

Plant the seedling in the desired patch or pot.

### STORAGE & USE INSTRUCTIONS

Keep the dried Coco Dots box somewhere cool and dry until you are ready to use it.

Use in a well ventilated place and avoid breathing in any dust.

### SUSTAINABILITY

- ✦ 100% Peat Free, made from 100% Natural Coconut husks.
- ✦ After harvesting, it is stored, ground, washed, dried, and compressed.
- ✦ Coco Coir is a natural by-product of the coconut farming industry and causes minimal impact on the environment
- ✦ It is the most environmentally friendly alternative to peat moss
- ✦ Eco-friendly, recyclable, easy to carry packaging

### PACKAGING

#### OUTER BOX & LABELS:

Mixed FSC certified corrugated boxes and product labels, widely recycled

#### INNER WRAP:

Where applicable, LDPE Shrinkwrap, recyclable where facilities exist
