

# COCO BOOST™

## PEAT FREE COIR COMPOST WITH ADDED NUTRIENTS

Based on natural coir with added nutrients, Coco Boost is the perfect potting compost, creating the ideal rooting and growing conditions for all plants growing in containers.

### FEATURES

- ✦ 100% peat-free ✦ pH and nutrient balanced
- ✦ NPK composition - nitrogen (N), phosphorous (P), potassium (K)
- ✦ Made from natural renewable resources, biodegradable
- ✦ Easy to handle, uniform in composition, odourless
- ✦ Provides good drainage, good aeration
- ✦ Free of bacteria and weed seeds
- ✦ Absorbs water readily and re-wets easily reducing the need for wetting agents

### BENEFITS

- ✦ Sustainable and environmentally friendly
- ✦ NPK (20-20-20)
- ✦ Boosts foliage growth
- ✦ Stronger flower and fruit development
- ✦ Enhances overall plant vigour
- ✦ Improved root growth
- ✦ Enhanced water retention, long lasting
- ✦ Can be used repeatedly
- ✦ Lightweight and easy to carry

### USES

- ✦ Great for sowing seeds and rooting cuttings
- ✦ Potting-on young plants and growing them on
- ✦ Use in pots, containers and hanging baskets
- ✦ Indoor and outdoor planting

### TECHNICAL SPECIFICATIONS

pH Value	5.5 - 6.8
Electrical Conductivity (EC Value)	<1.0ms/cm
Coir Ageing	6+ months
Sand	<3%
Sieve	<6mm
Moisture	13-20%

### HOW TO USE:

Remove all packaging and recycle.

Simply put your compressed Coco Coir Peat brick in a container. Add warm water.

Let it sit until the water is absorbed (~10min)

Fluff it up and you are ready to start planting!

### STORAGE & USE INSTRUCTIONS

Keep the dried Coco Boost block somewhere cool and dry until you are ready to use it.

Use in a well ventilated place and avoid breathing in any dust.

### APPROXIMATE USE OPTIONS

Each dried 1kg Coco Boost block expands to make 15 litres. This is enough to fill:

MEDIUM POTS 10 pots x 15cm (6") dia.	LARGE POTS 2 pots x 25cm (10") dia.
MEDIUM BASKET 4.5 baskets x 15cm (6") dia.	HANGING BASKET 2.5 baskets x 30cm (12") dia.

### SUSTAINABILITY

- ✦ 100% Peat Free, made from 100% Natural Coconut husks.
- ✦ After harvesting, it is stored, ground, washed, dried, and compressed.
- ✦ Coco Coir is a natural by-product of the coconut farming industry and causes minimal impact on the environment
- ✦ It is the most environmentally friendly alternative to peat moss
- ✦ Eco-friendly, recyclable, easy to carry packaging

### PACKAGING

**OUTER BOX & LABELS:**  
Mixed FSC certified corrugated boxes and product labels, widely recycled

**INNER WRAP:**  
Where applicable, LDPE Shrinkwrap, recyclable where facilities exist
